FDA Food Facility Registration is required under laws created by both the Bioterrorism Act of 2003 and Food Safety Modernization Act (FSMA) of 2011 (effective in November, 2015). Boiling maple sap to create maple syrup has been defined by FDA as an act of processing. Maple Syrup Producers are required to register if more than 50% of the total syrup crop is sold to another processor. General information about FDA registration and renewal in 2022 can be found in here:

<https://www.fda.gov/media/160352/download>

- Registration is **FREE** – but must be completed on the FDA registration web-site.
- Registration is a two-step process:
 - First **set up an account** (save your account ID and password for future renewals)
 - Second **submit a registration** (keep account number and PIN for your records)
- Registration must be **renewed every two-years**; by Dec. 31 of every even numbered year.
- In 2020 the FDA has added a requirement for a **Unique Facility Identifier**, which can be a DUNS number. A DUNS number is free but must be requested on-line. Here is the link to Dun & Bradstreet “Get a DUNS number” section <https://www.dnb.com/duns-number/get-a-duns.html>
